- Yen Interest Rate Swaps

## Accurate Prices for Monitoring Markets

As a global network, Tradeweb provides access to deep liquidity across the fixed income and derivative markets. Tradeweb allows for an unprecedented level of information to help with critical investment decisions.

## Tradeweb Composite Price

Sourcing prices from major dealers across our 'Request for Quote' products ensures the Tradeweb Composite Price is the most accurate indication of market levels. The Tradeweb Composite can drive pricing engines, power risk monitoring and be used to derive prices for customer websites and extranets.

## To access Tradeweb Market Data:

### Marks Products

Tradeweb Marks, the benchmark download service, receives price downloads for thousands of securities at critical times throughout the day: morning open, Euribor Fix, Libor Fix and 'end of day' (in London 8.05am, 10.00am, 11.00am, 3.00pm, 4.15pm and 4.45pm).

ECP has recently been added to the Tradeweb Marks service.

### Data Feed

Fast, easy to set up and seamless, the data feed integrates Tradeweb's streaming prices directly into your pricing, analytical and compliance systems. This critical information helps best execution requirements, risk monitoring and profit and loss reporting.

### Spreadsheet link

Feeds real-time updates directly from Tradeweb into your Excel™ spreadsheets for simple price monitoring, or customised modelling and analysis.
